

**071227/F438W**

This is a grayscale astronomical image showing a dark, elongated, and somewhat irregular object, possibly a filament or a cluster of stars, oriented diagonally from the upper right to the lower left. A small red circle is drawn around a specific point on the lower-left portion of this object. The background is filled with a dense field of small, faint stars. The image is labeled with '071227/F438W' at the top, and '15.55 kpc' and '3 arcsec' at the bottom left.

**15.55 kpc**  
**3 arcsec**
